- deboragarciaescudero@gmail.com

My move to Sweden sparked a professional transformation, leading me to pursue my passion for technology. After completing a full-stack web development course, I am currently engaged in my first project. My objective is to consolidate my knowledge and secure my first position in the technology sector.

DEBORA GARCIA

FULL STACK DEVELOPER

EXPERIENCE

Front End Developer

Apr 2025 – May 2025

Igrowker

- Participated in an intake program for the development of **Routeen**, a web application to simplify the planning, assignment, and tracking of training routines between coaches and athletes, helping digitalize coaches' daily tasks and support athletes in achieving their goals.
- Led the front-end development team, utilizing technologies such as **React.js**, **TypeScript**, and **TailwindCSS**.
- Worked closely with the Product Manager to enhance features and made strategic decisions in conjunction with the UX team to improve the overall user experience.

Front End Developer

Nov 2024 – Dec 2024

Igrowker

- Participated in a one-month intensive program to develop an MVP: **Crewland**, a full-stack web application designed to connect users interested in concerts and festivals. The app allowed users to find companions and connect with others attending the same events in their area.
- Played a key role in front-end development, creating dynamic, user-friendly interfaces using **Next.js**, **React**, and **TypeScript**.
- Collaborated within a team environment, simulating real-world workflows by applying agile methodologies, including daily standups, sprint reviews, and retrospectives.
- Strengthened soft skills, including teamwork, communication, and task prioritization actively using **GitHub**.

Full Stack Web Developer

Aug 2024 – Present

Freelance

- After completing my studies in Full Stack Development, I am continuing to work on my first project.
 - LevelUp**, a web application for CrossFit enthusiasts. It allows users to log achievements, create workouts, and share them with the community. Built using **MERN** stack and **AWS S3** for cloud file storage, it is deployed on **Netlify**, **Render**, and **MongoDB Atlas**, ensuring a scalable and robust architecture. [GitHub](#)
- I am exploring emerging web development technologies and tools such as **TypeScript**, **Redux**, and **AWS**.

Career Break

Sep 2021 – Dec 2022

Commitment to personal development

- Relocated to Sweden to explore new professional opportunities and improve my English for the international job market, actively seeking employment and reflecting on my career path during this time.

SKILLS

Git	GitHub	Canva
Agile	Testing	Figma
TDD	Clean Code	SPA

PERSONAL INTERESTS

Discovering new **cultures** and perspectives through **travel**

Fitness and personal **well-being**

Enjoying **nature** by hiking and outdoor activities

Exploring emerging **technologies** and building coding personal projects

Scuba **diving** and marine conservation

R&D Laboratory Analyst

Apr 2015 – Jul 2022

Reig Jofre, Barcelona

- Quality control, validation and stability studies for pharmaceutical products, ensuring compliance with industry standards and regulations (FDA).
- Managed documentation, equipment maintenance in a regulated laboratory environment (GMP, GLP)

Quality Control Analyst

Oct 2014 – Mar 2015

Kao Corporation, Barcelona

- Quality control sampling. Physicochemical and organoleptic analysis.

EDUCATION

Full Stack Developer

Mar 2024 – Aug 2024

ISDI Coders

- Over 230 hours focused on building web applications using the MERN stack: **MongoDB**, **Express.js**, **React** and **Node.js**.
- **Clean Code**, **Agile** method, **testing** (Mocha & Chai) **Git** and **GitHub**.
- **Highlighted projects:**
 - **Socialcode:** A social media platform that was developed using **vanilla JavaScript** and **DOM** manipulation, with subsequent upgrades from **ES5** to **ES6** and **React**. The styling was enhanced from **CSS** to **Tailwind**, resulting in a modern, responsive design.
 - **LevelUp:** A fitness application developed as the final project of the full-stack developer course, applying all the skills and knowledge acquired.

JavaScript Fundamentals
